

Information Released under Environmental Information Regulations (EIR) 2004**Subject: National Severe Weather Warnings Service (NSWWS)****Date Released: 22/10/2018****Summary of request:**

The request is how many (a) Yellow and (b) Red NSWWS Warnings were there for Central Belt of Scotland (Glasgow across Stirling to Edinburgh) per year for the last 5 years.

Information released:

The Met Office holds this information and is provided in the table below:

	Yellow	Amber	Red	Total
Aug-Dec 2013	120	6	0	127
2013 (all)	310	17	0	327
2014	239	3	0	242
2015	260	19	2	281
2016	192	15	0	207
2017	148	5	0	153
Jan-Sep 2018	142	12	1	155

The data covers the Warning regions: Central, Tayside & Fife, Strathclyde and Lothian Borders. It includes all warnings (initial issues, updates and cancellations).

In order to provide advice and assistance, a full guide to the weather warnings is published on our website page: <https://www.metoffice.gov.uk/guide/weather/warnings>.
