

Fund management

East Africa programme to improve quality and use of weather and climate information

Policy and Enabling Environment Component to improve governance for weather and climate services across Africa

Ambitious targets - 2016-2020

Access to improved weather and climate information for **30 organisations and 3,500,000 households**

Policy and Enabling Environment Component key achievements

Socio-economic benefits of CIS

Demonstrating the **socio-economic benefits of CIS** to policy makers through a combination of modelling, research and advocacy

Support to African Regional Climate Centres

Identifying needs and gaps, sharing lessons, **developing best practices** and promoting standards among African Regional Climate Centres (RCCs)

Climate Research for Development (CR4D) Programme

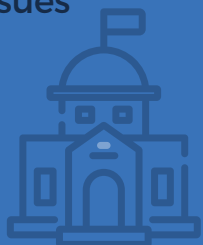

Identifying **climate research priorities** and overseeing research implementation

WISER East Africa - key achievements

Governmental impact

11 government departments in Kenya and Tanzania with improved understanding of weather and climate issues and access to services

Household access to weather forecasts

Almost **1 million households** receiving new and improved forecast services in Kenya and Tanzania

Improved food security

Drought alerts in 2016 helped prevent worsening food security conditions in East Africa
