NWR: Superuser functionality Getting to know the thresholds page

The 'Thresholds' page allows the Superuser to set Red Amber Green status thresholds specific to their organisation.

On the map, squares indicate the status of a TAF, circles indicate the status of a METAR. The colours displayed are triggered by what has been set in the threshold page.

Hovering your cursor over the abbreviations will display the full term.

If you have any issues, please contact 0370 900 0100.

To find out more about NWR, register your organisation and view our other resources, visit our website: www.metoffice.gov.uk/nwr

Set thresholds by either inputting weather limit values or clicking the coloured buttons to scroll through Red Amber Green.

Please note: threshold changes will only apply to the map when the next set of METAR reports come through.

Highlighting colour coding

Red	Severe	0
Amber	Moderate	0
Green	All clear, no highlighting applied	
Grey	Expired or NIL report	0
White	No data available	O
